

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1-18 (Canceled)

19 (currently amended). A method of assaying a nucleic acid, comprising:

(a) contacting a solution suspected to contain said nucleic acid with a compound comprising a plurality of covalently- bound nucleosides, the compound being capable of specifically hybridizing to said nucleic acid; said compound having the formula:

wherein:

each  $N_U$  is, independently, a nucleoside that includes a ribose or deoxyribose sugar portion and a base portion;

$L_S$  is a racemic phosphorothioate internucleoside linkage;

$n$  is 1-200; and

$L_1$  and  $L_2$  are independently selected such that:

$L_1$  is a Sp phosphorothioate internucleoside linkage,  $L_2$  is a racemic phosphorothioate internucleoside linkage, and said compound has greater than about 60% stereoisomeric purity; or

$L_1$  and  $L_2$  both are Sp phosphorothioate internucleoside linkages and said compound has greater than about 60% stereoisomeric purity; or

$L_1$  is a Rp phosphorothioate internucleoside linkage,  $L_2$  is a racemic phosphorothioate internucleoside linkage, and said compound has greater than about 60% stereoisomeric purity; or

$L_1$  and  $L_2$  both are Rp phosphorothioate internucleoside linkages and said compound has greater than about 60% stereoisomeric purity;  
or

$L_1$  and  $L_2$ , independently, have the formula  $CH_2-O-NR$  or  $CH_2-NR-O$  wherein R is H, alkyl having 1 to about 10 carbon atoms, alkenyl having 2 to about 10 carbon atoms, alkynyl having 2 to about 10 carbon atoms; alkaryl having 7 to about 14 carbon atoms, aralkyl having 7 to about 14 carbon atoms; and

(b) determining if said nucleic acid is present by determining if said hybridization has occurred.

20-33 (canceled)

34. (Previously presented) The method of claim 19 wherein  $L_1$  is a Sp phosphorothioate internucleoside linkage and  $L_2$  is a racemic phosphorothioate internucleoside linkage.

35. (Previously presented) The method of claim 19 wherein  $L_1$  and  $L_2$  both are Sp phosphorothioate internucleoside linkages.

36. (Previously presented) The method of claim 19 wherein  $L_1$  is a Rp phosphorothioate internucleoside linkage and  $L_2$  is a racemic phosphorothioate internucleoside linkage.

37. (Previously presented) The method of claim 19 wherein  $L_1$  and  $L_2$  both are Rp phosphorothioate internucleoside linkages.

38. (Previously presented) The method of claim 19 wherein  $L_1$  or  $L_2$  is  $CH_2-O-NR$ .

39. (Previously presented) The method of claim 19 wherein  $L_1$  or  $L_2$  is  $CH_2-NR-O$ .

**PROCEDURE PURSUANT TO**  
**37 CFR § 1.116**

40. (Previously presented) The method of claim 19 wherein  $L_1$  and  $L_2$  are both  $\text{CH}_2\text{-O-NR}$ .

41. (Previously presented) The method of claim 19 wherein  $L_1$  and  $L_2$  are both  $\text{CH}_2\text{-NR-O}$ .

42. (Previously presented) The method of claim 19 wherein R is alkyl.

43. (Previously presented) The method of claim 19 wherein R is methyl.

44. (Previously presented) The method of claim 19 wherein at least one of said nucleosides includes a ribose sugar portion.

45. (Previously presented) The method of claim 19 wherein at least one of said nucleosides includes a deoxyribose sugar portion

46. (Previously presented) The method of claim 19 wherein n is about 5 to about 50.

47. (Previously presented) The method of claim 19 wherein n is about 8 to about 30.
